

- from blows to the terminal cover and sidewalls onto the non-integral support surface not part of the bank card terminal, while protecting the bank card terminal from contact with liquids, dust, grease, and falling objects, and
- ii. having at least one opening through which a terminal cord may be inserted and connected to the bank card terminal.

Amend Claim 16 to read as follows:

16. (amended) A bank card terminal cover for bank card terminals adapted to be placed on a vertical non-integral separate support surfaces and having exterior exposed card reading slots and keyboards pervious to liquids, grease, and dust, and electrical connections, comprising:
- a. a transparent rigid, crush resistant, liquid, dust, and grease impervious top with
- b. a plurality of rigid, crush resistant, liquid, dust and grease impervious sidewalls which define an open bottomed interior chamber sized to fit about and direct contact forces, liquids, dust and grease coming into contact with the cover away from the bank card terminal and onto [when placed on] an independent support surface not part of the bank card terminal; said sidewalls
- i. extending sufficiently to contact the non-integral support surface not part of the terminal cover to elevate the top of the terminal cover above and about the bank card terminal to direct the force from blows to the cover and sidewalls onto the non-integral support surface not part of the bank card terminal, while protecting the bank card terminal from contact with liquids, dust, grease, and falling objects, and
- ii. having at least one opening through which a terminal cord may be inserted and connected to the bank card terminal,
- c. opening structure associated with the top of the bank card terminal and terminal cover to provide access to the bank card terminal keyboard and card reading slot in a first
